## Google Search Console: Impressions to Traffic Analysis

Report Period: May 25 - June 3, 2026 (28 days)

### ■ Current Performance

| Metric                   | Value | Status            |
|--------------------------|-------|-------------------|
| Total Impressions        | 554   | ✓                 |
| Total Clicks             | 4     | ■■                |
| Click-Through Rate (CTR) | 0.72% | ■ Below Target    |
| Avg. Search Position     | 29.6  | ↓ Room to improve |

### ■ The Opportunity

Your current CTR of **0.72%** means you're converting only 4 out of 554 search impressions into clicks. With your target CTR of **2-3%**, you could be driving significantly more traffic to your site.

### ■ Traffic Projections (Monthly Annualized)

| CTR Scenario        | Monthly Clicks | Annual Clicks | vs. Current |
|---------------------|----------------|---------------|-------------|
| Current (0.72%)     | 4              | 48            | Baseline    |
| Conservative (1.5%) | 8              | 96            | +100%       |
| Target (2.5%)       | 14             | 168           | +250%       |
| Optimistic (3.5%)   | 19             | 228           | +375%       |

# Detailed Performance Breakdown

## ■ Device Performance

| Device  | Impressions | Clicks | CTR   | Avg. Position |
|---------|-------------|--------|-------|---------------|
| Desktop | 451         | 2      | 0.44% | 25.30         |
| Mobile  | 102         | 2      | 1.96% | 27.18         |
| Tablet  | 1           | 0      | 0.00% | 4.00          |

**Insight:** Mobile has 4.5x higher CTR (1.96% vs 0.44%) despite fewer impressions. This suggests your mobile UX or title/meta tags are stronger on mobile. Investigate mobile's success factors and apply to desktop.

## ■ Top Geographic Markets

| Country        | Impressions | Clicks | CTR   |
|----------------|-------------|--------|-------|
| United States  | 346         | 4      | 1.16% |
| Japan          | 25          | 0      | 0.00% |
| United Kingdom | 21          | 0      | 0.00% |
| Canada         | 12          | 0      | 0.00% |
| Brazil         | 11          | 0      | 0.00% |

**Insight:** US dominates impressions (346) and all 4 clicks came from the US (1.16% CTR). International traffic shows 0% CTR—consider if international landing pages need localization or better messaging.

## ■ Top Performing Queries

| Query                     | Impressions | Clicks | CTR   | Avg. Pos. |
|---------------------------|-------------|--------|-------|-----------|
| is new york safe to visit | 82          | 1      | 1.22% | 13.20     |
| is nyc safe               | 22          | 0      | 0.00% | 40.00     |
| is manhattan safe         | 20          | 0      | 0.00% | 40.90     |
| travel to nyc alone       | 17          | 0      | 0.00% | 44.53     |
| is new york safe          | 12          | 0      | 0.00% | 27.75     |

**Insight:** Only 1 click from your top 5 queries. "is new york safe to visit" has the best CTR (1.22%) but ranks 13th—you have room to improve rankings and title/meta optimization.

# Strategic Recommendations

## ■ To Close the Gap from 0.72% → 2.5% CTR

### 1. Optimize Titles & Meta Descriptions

Your mobile CTR is 4.5x higher than desktop. Analyze mobile-performing queries and replicate their title/meta structure on desktop. Focus on CTAs like 'Learn,' 'Safe Travel Guide,' 'Solo Travel Tips' that match search intent.

### 2. Improve Click-Worthiness of Ranking Pages

You're ranking for "is new york safe to visit" (position 13) with 1 click from 82 impressions. Improve your title/meta to match: 'Is NYC Safe? Honest Guide for Solo Travelers 2026' — emphasize your unique voice & street-level advice.

### 3. Target Positioning Improvements

Average position is 29.6. Keywords ranking 20+ rarely get clicks. Prioritize moving top 10 keywords into top 5 with content depth, backlinks, and search intent alignment.

### 4. Localize for International Traffic

Japan (25 impressions, 0 clicks), UK (21, 0 clicks) show 0% CTR. Consider country-specific landing pages (e.g., 'Solo Travel NYC—Guide for Japanese Travelers') to improve relevance and CTR.

### 5. Monitor Mobile Success

Mobile is outperforming (1.96% CTR). A/B test mobile-winning title formats on desktop. Track which queries convert better on mobile and why.

## ■ What Success Looks Like

| Metric         | Current | 90-Day Target | Impact                 |
|----------------|---------|---------------|------------------------|
| CTR            | 0.72%   | 1.5-2.0%      | +100-180% clicks       |
| Avg. Position  | 29.6    | <20           | Higher visibility      |
| Monthly Clicks | 4       | 8-11          | More leads into funnel |

## Next Steps

1. **Audit your top 5 queries** in GSC. Identify which have high impressions but 0 clicks (biggest opportunity).
2. **Rewrite titles & metas** for these queries using your brand voice: blunt, streetwise, trustworthy.
3. **Check mobile search results**—what's working there that isn't on desktop?
4. **Resubmit content** to Google Search Console and monitor CTR weekly.
5. **Set a 90-day goal:** Move to 1.5–2.0% CTR (8–11 monthly clicks).
